EXAMINER'S COMMENT

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent No. US 6,792,189 B2 to Sasaura et al. discloses an optical waveguide material comprising potassium lithium tantalate niobate ("KLTN"). Patent No. 5,614,129 to Hofmeister et al. discloses an optical material comprising a crystal having a composition of KLTN and at least one element selected from the group consisting of various first transition elements and lanthanides. The crystal material of Hofmeister also has a perovskite structure. However, neither the Sasaura patent nor the Hofmeister patent disclose that at least one element selected from the group consisting of Zr, Hf, and Sn substitutes for a portion of one element of the constituent elements of the KLTN as recited by claims 1 and 9. Furthermore, no additional evidence is available at this time to suggest modifying either Hofmeister or Sasaura to include such a feature. Therefore, claims 1 and 9 are still deemed allowable for the reasons set forth in the previous Office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Rojas whose telephone number is (571) 272-2357. The examiner can normally be reached on Monday-Friday (12:00PM-8:00PM).
